## Steer Axle Weights: 5-Axle Log Trucks

## Drive Tandem Weights: 5-Axle Log Trucks

## Rear Tandem Weights: 5-Axle Log Trucks

## Gross Weights: 5-Axle Log Trucks

## Logging Weight Takeaways

On average, log trucks are able to load their products relatively evenly between the drive \& rear tandem axles.

## Logging Weight Takeaways

- The steering axle carries between $10 \mathrm{~K} \& 12 \mathrm{~K}$ pounds.
- $94 \%$ of trucks
- The drive tandem carries between $36 \mathrm{~K} \& 42 \mathrm{~K}$ pounds.
- $72 \%$ of trucks
- The rear tandem carries between 36 K \& 42K pounds.
- $66 \%$ of trucks
- Gross weight is loaded between $84 \mathrm{~K} \& 96 \mathrm{~K}$ pounds.
- $81 \%$ of trucks

## Logging Weight Takeaways

## Less than 10\% of trucks are loaded at less than 80 K pounds.

More than $21 \%$ of trucks are loaded at more than 88 K pounds.

## Logging Weight Takeaways

## Clearly, in practice, the loading target is well above the legal limit.

Operators are loading to the maximum
limits of the scale tolerance, not to the legal limits provided by Alabama law.
